

We are passionate about the oceans and we seek adventures in the sea. We are dedicated to preserve and protect the precious marine environment and promote the safety of diving.

We have a lot of international and local experience in training, trip arrangement, equipment retailing and promoting marine conservation as we have been in the diving industry for over 15 years in the United Arab Emirates and South East Asia. This combined with our innovative local managing partner we offer a broad spectrum of experience and talents to meet the needs of our customers.

Some of our work
