

SAI Starguard lifeguard training

One of the fastest growing lifeguard training agencies world wide an across USA. There are many reasons that park districts, aquatic facilities, waterparks and educational institutions are choosing the Starguard program to tran lifeguard staff:

Experiential approach to learning

Competency is developed through a holistic learning experience in which practical skills are integrated throughout the program.

Focus on professionalism and accountability: The Starguard program teaches behaviours and skills to help lifeguards reduce risk and be at their best and ready to take action in the event of an emergency. Infrequent responders must be properly prepared to respond - emotionally and technically.

Blended approach training option with online course covers all the key points of essential knowledge; when paired with a scenerio-based, hands on training session, it creates a competent and confident lifeguard. The effecient use of facility space and instructor time helps reduce training expenses, thus saving time and money.

Dedicated support staff: Aquatics is what we do best

Control cost, time and adminstration by becoming a training provider

Comprehensive risk management system supports the training program if you shoose to participate

We also provide monhtly in-service training to keep your lifeguard skills sharp and lifeguards ready to respond.
