DISCOVER HOW AMAZING IT IS TO BREATHE UNDERWATER!

~~PADI Discover Scuba Diving is a PADI course for people who want to try scuba diving for the first time. It is a non-technical course that can be completed in a single day. The course includes a theory session, a confined water session, and an open water session. The theory session covers the basics of scuba diving, including the equipment, the rules, and the safety procedures. The confined water session is conducted in a pool and includes basic skills such as breathing underwater, clearing the mask, and recovering from a panic attack. The open water session is conducted in the ocean and includes a short dive to a maximum depth of 12 meters. The course is suitable for people of all ages and fitness levels, provided they are in good health and have no contraindications to diving. The course is taught by a PADI instructor and a PADI assistant instructor. The cost of the course varies depending on the location and the type of equipment used. The course is a great way to experience scuba diving and to decide if you want to pursue a full PADI scuba diving certification.~~
